

XM Instant Traffic and Weather is a great benefit to motorists everywhere that it is available. It focuses on situations a driver needs to know about at all times without the commercial interruptions. I pay a monthly fee for my service and I do not believe that the National Association of Broadcasters should be able to have any control over a service that I pay for. Competition is a major part of our economy, if the NAB feels that satellite radio is a threat to their business then they should change their programming, not eliminate a service that 1.7 million Americans and growing believe is worth a monthly subscription fee. I respectfully urge the FCC to reject the NAB's petition 04-160 and support satellite radio to provide programming that I and all other subscribers deserve.
